

FERVOUR TECHNOLOGIES

Enterprise Operations Manager

End-to-End Manufacturing ERP for Growing Industries

MANUFACTURING ERP

Manufacturing ERP

Overview

EOM is a comprehensive enterprise operations platform purpose-built for Indian manufacturers. From raw material procurement to finished goods dispatch, EOM digitises every workflow — giving management real-time visibility, reducing waste, and enabling data-driven decisions at every level of the factory floor.

The Challenge

▶ No Real-Time Visibility

Production status, inventory levels, and machine utilisation are only known at the end of the shift — too late to course-correct.

▶ Disconnected Departments

Purchase, production, sales, and accounts operate in silos. Critical information is lost in email threads and WhatsApp groups.

▶ Manual Planning & Scheduling

Production planning is done on spreadsheets, leading to missed delivery dates, idle machines, and overtime costs.

▶ Compliance & Traceability Gaps

No end-to-end lot traceability means quality incidents are hard to isolate and costly regulatory audits are a recurring headache.

The Solution

EOM unifies procurement, inventory, production scheduling, quality control, and finance into a single cloud platform. Built for the Fervour Standard architecture, it deploys in weeks — not months — and is priced transparently for Indian SMB budgets.

Key Benefits

Live Production Dashboard

Real-time visibility into work-order progress, machine OEE, and batch status across every shift.

Integrated Procurement

Purchase requisitions, vendor quotes, POs, and GRNs in one flow with automatic inventory updates.

Smart Scheduling Engine

Plan production runs based on actual BOM requirements, machine availability, and delivery deadlines.

Quality & Traceability

Lot-level tracking from raw material to dispatch. Instant recall scope identification in case of a quality event.

Finance Integration

Lean operational finance with Tally bridge — keep your statutory books without duplicate data entry.

Module Toggle Architecture

Pay only for what you need. Enable new modules as your business grows — no reinstallation required.

Platform Modules

✓ Foundation & RBAC

✓ Production Planning

✓ Procurement

✓ Lean Finance

✓ AI Insights (Coming Soon)

✓ Inventory Management

✓ Work Order Management

✓ Vendor Management

✓ Event Bus & Automation

✓ Bill of Materials

✓ Quality Control

✓ Sales & Dispatch

✓ Reports & Analytics

Why Fervour Technologies?

Built for India

Designed for Indian workflows, compliance requirements, and budget realities — not adapted from Western enterprise software.

Rapid Deployment

From contract signing to go-live in weeks. Our structured deployment methodology keeps timelines predictable.

Predictable Pricing

Transparent sub-module pricing with no hidden implementation fees. Pay for what you use, scale as you grow.

Dedicated Support

A named support engineer, not a ticket queue. Fast response times and proactive issue resolution — always.
